EDUCATION

SCHOOL - DON BOSCO HIGH SCHOOL

DIPLOMA -VREC BRANCH IN CSE

GRADUATION -SNIST BRANCH IN CSE

TECHNICAL SKILLS

🔥 **FIREBASE**

🐍 **Python**

☕ **Java**

</> **AI&ML**

HTML,CSS,JS

SOFTWARES & SKILLS

Personal Projects

-I developed an application using HTML, CSS, JavaScript, and Python for writers, where they can write stories and publish them for free. They can also earn money from readers

-I developed an alien game in Unreal Engine. The specialty of my games is that all of them are story-based. In this game, the hero needs to find elements while aliens try to kill him. The assets for the game were created using Blender and ZBrush.

- I developed an image classification project and a personal assistant using NLP, both in Python.

-I developed a 2D ninja game in Unity, and all the background assets were drawn by me in Photoshop
